-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1724

Applicant's election, without traverse, of **acetone** as the regeneration solution compound species and **isopropanol in water** as the diluent species is acknowledged. Claims 4,5 and 23-27 are withdrawn from further consideration, as being directed to a non-elected species.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 9-11, 15, 16, 22 and 28 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Wang et al. (U.S. Patent No. 6,790,364). See col. 1, lines 29-30; col. 2, lines 51-53; and col. 3, lines 1-34.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8, 12-14, 17-21 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al. The reference discloses the claimed invention with the exception of the relative amounts of borane extracting compound and diluent present in the regeneration solution. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ a regeneration solution having the recited percentages of borane extracting compound and diluent in the reference process, since this reference discloses that the

Art Unit: 1724

percentage of this borane extracting compound can vary greatly in the regeneration solution (see col. 3, line 33).
